Honours Biology Symposium
April 16th
Stewart Biology N7/1
10:00 - 13:25

On April 16th join us for the 2019 Honours Biology Symposium. Enjoy presentations from this year’s Honour Biology students and learn about undergraduate research across the department. Lunch and refreshments will be served at the end of the event.

Schedule
10:00 Opening remarks
10:10 Pascale Caissy (Hargreaves lab)
Project: Geographic situation of imperiled plants in Canada: are we focusing our conservation efforts on peripheral populations?
10:35 Victor Cameron (Hargreaves lab)
Project: Exploring the relationship between the spatial distribution and the conservation of terrestrial mammals in Canada
11:00 Adrian Foster (Reader lab)
Project: Does perceived risk affect social learning in Trinadian guppies?
Break
11:35 Sandrine Beaumont-Courteau (Hendry lab)
Project: Phenotypic variations of native fish species along an ion gradient in the St. Lawrence River
12:00 Sophia Hsu (Ricciardi Lab)
Project: Microplastic dose-dependent ingestion effects on freshwater invasive species
Break
12:35 Sarah Elliott (Watson lab)
Project: Functional characterization of novel melanoma oncogenes and tumor suppressors utilizing a CRISPR/CAS9 mouse model
13:00 Thomas Marsh (Schoeck lab)
Project: Analysis of the PDZ Domain Protein Zasp67, in Drosophila Muscles
13:25 Closing remarks
