

Seeking individuals for two positions as either a postdoctoral fellow (must have a graduated with a Ph.D. degree no more than five years ago), research assistant (must have M.Sc. or Ph.D. degree) or research associate (must have Ph.D. degree). Preference will go to individuals with experience using *Arabidopsis* or *Brassica* as model systems, demonstrated molecular biology, transgenics and/or genomics experience especially as it relates to functional gene/protein analysis, and capable of working in a group or as a group leader. Please see <http://biology.mcgill.ca/vegi/index.html> for general details about the project. If interested, contact Dr. Thomas Bureau ([thomas.bureau@mcgill.ca](mailto:thomas.bureau@mcgill.ca)) and attach CV and the names and coordinates of three references.
